Key features

SQUIX

Label printers for industrial applications

They are for use in a wide range of applications.

They have been developed with a constant focus on easy and intuitive operation as well as high reliability.

The print mechanics and the chassis are made from high-quality materials and perfectly match in shape and function.

A large number of peripherals and software enable customer-specific solutions.

Whether operated stand-alone, linked to a PC or in a network – the rugged printers are always up to the mark.

A powerful processor results in print jobs performed quickly and labels provided straight away.

- reliable and fast printing
- accurate print images
- easy to operate
- compact design
- maximum quality standards

Sample applications

PCB labeling

Type plate labeling

Cardboard and pallet labeling

Label printers with left-aligned material guidance

designed for printing in different print widths on various materials

1.1, 1.2

Slim ones

to print small labels

Label printer		SQUIX 2	
Printable resolution	dpi	300	600
Print speed	up to mm/s	250	150
Print width	up to mm	56.9	54.1

1.3, 1.4

Universal ones

Best-selling industrial devices, providing a wide range of accessories

Label printer		SQUIX 4.3		SQUIX 4	
Printable resolution	dpi	203	300	300	600
Print speed	up to mm/s	250	250	300	150
Print width	up to mm	104	108.4	105.7	105.7

NEW Basic devices may be provided with an integral cutter.

1.5, 1.6

Wide ones

to print Odette, UCC and GS1 labels in logistics applications

Label printer		SQUIX 6.3	
Printable resolution	dpi	203	300
Print speed	up to mm/s	250	250
Print width	up to mm	168	162.6

Basic device

providing a tear-off plate

They print on labels or on continuous materials wound on rolls or fanfold. Materials are torn off on a jagged plate. Cutting is an option, so is external rewinding.

Peel-off device

providing a rewinder internally

Peeling off labels is a feature added to a basic version. Labels are separated from the liner after printing to be removed by hand or by an applicator. Delivery includes a digital I/O interface

The extra wide one

to print pallet or barrel labels

Label printer		A8+
Printable resolution	dpi	300
Print speed	up to mm/s	150
Print width	up to mm	216

For further information on the A8+ see **www.cab.de/en/a8plus**

Label printer with left-aligned material guidance

as a peel-off device providing a rewinder internally

Label printer SQUIX 4 P,
peel-off device providing a rewinder internally

1 Hinged cover
Material stock can be checked and entire printing processes followed through a large panoramic window.

2 Plungers
One is fixed on the inside. To get a good print image, the second one is moved to the outside margin of a label.

3 Rugged metal chassis
made of cast aluminum to assemble all the units

4 Coated print rollers
Synthetic rubber is a standard to get highly accurate print images. Silicone coating is an option for extra long service life.

5 Peel-off function
to separate labels from the liner. A powered guide roller and a pinch roller enable highly accurate imprint and peel-off.

6 Peripheral port
to plug additional modules easily and quickly. They are screw-fixed.

7 Ribbon holder
Ribbons are quick and easy to replace using three-part tightening axles.

8 Roll holder
Constant tension by means of the margin stop (spring-mounted, screw-capped) while material is fed

9 Internal rewinder
to wind labels or liners with or without a cardboard core on peel-off devices. Materials are easy to handle using a three-part tightening axle.

10 Rocker
Suspension and Teflon-made guide rollers reduce traction and improve the accuracy of print images.

11 Material guide
assembled to the rocker. By a user turning the rotary knob, the stop moves to the margin of a label.

Print image accuracy
The smaller a label, the higher are the demands.
Using slip correction, print offset can be reduced by ±0.2 mm.

Label printers with centered material guidance

1.7, 1.8

basic device

peel-off device

Precise and flexible ones

to print on all materials wound on rolls or reels or fanfold, in particular very small labels or slim continuous materials such as pressed shrink tubes.

Label printer		SQUIX 4.3M		SQUIX 4M	
Printable resolution	dpi	203	300	300	600
Print speed	up to mm/s	250	250	300	150
Print width	up to mm	104	108.4	105.7	105.7

Label printer SQUIX 4 MP, peel-off device providing a rewinder internally

Differences to left-aligned material guidance

1 Ribbon holder
A preprinted ruler simplifies setting a ribbon.

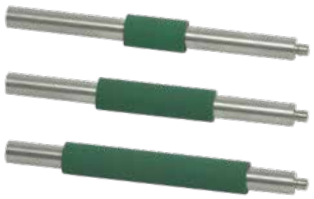
2 Plungers
Both positions remain fixed with all widths of material. There is no need of adjustment on the print head.

3 Roll holder
By applying the margin stop, a roll centers automatically

4 Material guide
attached next to the print roller to ensure accurate print images. Material widths are set with the help of a spindle

5 Slim print rollers
to obtain accurate print images if small materials and ribbons are in use. They prevent from roller wear, print head contamination and errors while materials are fed.

Synthetic rubber coating



DR4-M25

DR4-M50

DR4-M80

Label printers "MT" with centered material guidance and a separator

1.9

basic device

To print textile applications

In applications requiring high heat energies, a ribbon may stick with the textile tape after printing. A draw roller reliably separates the ribbon from the material.

Besides textile applications, also labels or continuous materials wound on rolls or reels can be printed. There is no need of setting the width a label by moving plungers. Adapted print rollers are provided for slim materials.

Label printer		SQUIX 4.3 MT	SQUIX 4 MT	
Printable resolution	dpi	300	300	600
Print speed	up to mm/s	250	300	150
Print width	up to mm	108.4	105.7	105.7

Differences to left-aligned material guidance

1 Ribbon holder
A preprinted ruller simplifies setting a ribbon.

2 Plungers
Both positions remain fixed with all widths of material. There is no need of adjustment on the print head.

3 Antistatic brush
to dissipate electrostatic charge after printing, in particular if plastic materials are in use

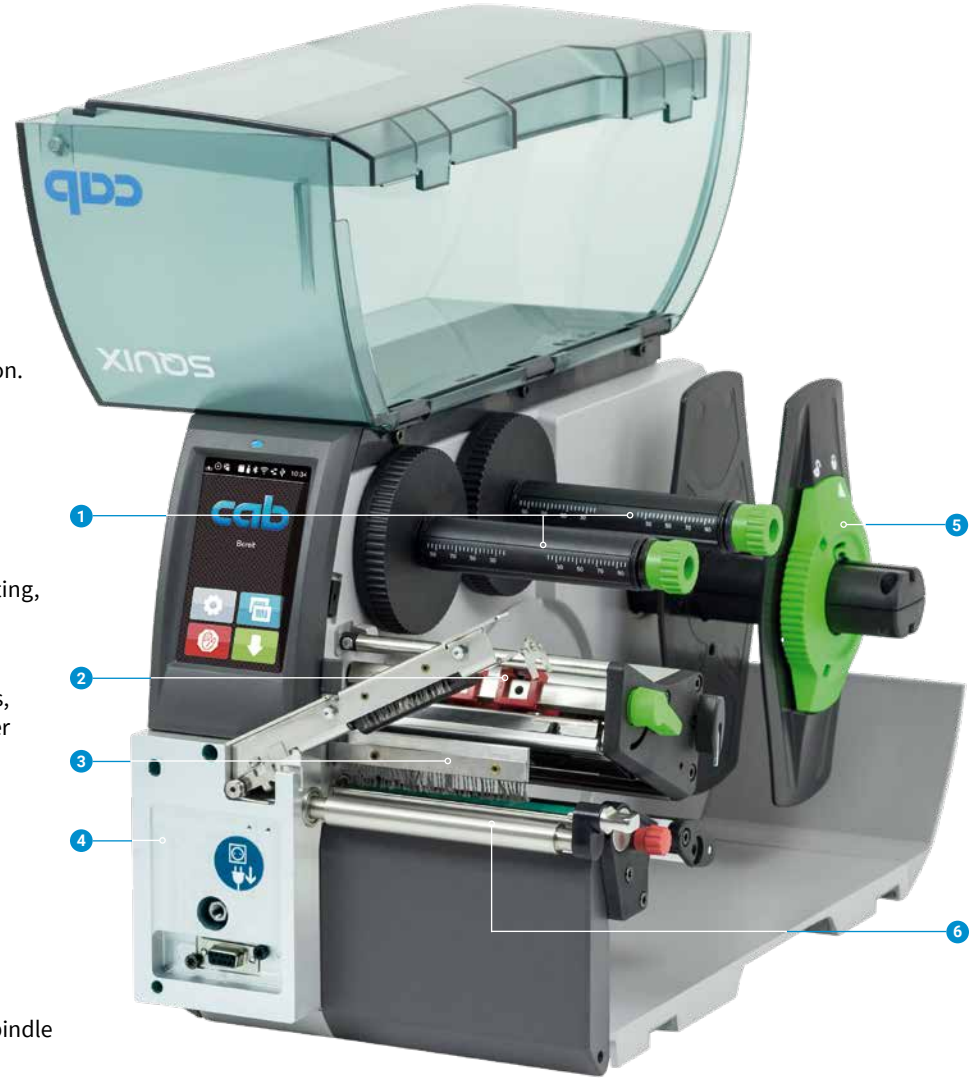
4 Separator
In applications requiring high heat energies, a ribbon may stick with the textile tape after printing. A draw roller reliably separates the ribbon from the material.

5 Roll holder
By applying the margin stop, a roll centers automatically

6 Material guide
attached next to the print roller to ensure accurate print images. Material widths are set with the help of a spindle

7 Slim print rollers
to obtain accurate print images if small materials and ribbons are in use. They prevent from roller wear, print head contamination and errors while materials are fed.

Synthetic rubber coating



Label printer SQUIX 4 MT providing a built-on separator

DR4-M25

DR4-M50

DR4-M80

Operation panel

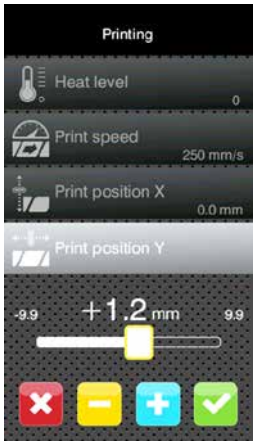
Self-explanatory symbols help with the device settings and enable a printer to be operated intuitive and easily.

1. **LED:** Power ON
2. **Status bar:** reception of data, record data stream, pre-warning to a ribbon ending, SD memory card / USB memory stick plugged, Bluetooth, WLAN, Ethernet, USB slave, time
3. **Printer status:** ready, pause, number of labels printed in a print job, label in peel-off position, external start signal awaited
4. **USB port** to plug a service key or a memory stick, to transfer data to the IFFS memory
5. **USB WLAN stick** 2.4 GHz 802.11b/g/n enclosed in the scope of delivery; In hotspot mode, mobile devices can connect directly to a printer via WLAN.
6. **Operation**

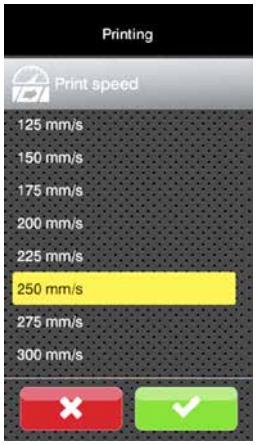
Cutter / perforation cutter:	cutting	
External rewinder:	wound outside or inside	
Tear-off mode / peel-off mode:	printing a label	
Applicator:	printing and labeling in individual steps	
Jump to menu	Stop and delete all print jobs	Interrupt and continue print job
Reprint last label	Label feed	

Setup options

Printing parameters



Print positions Y



Print speeds

Video tutorials

External operation panel

same functionality as on the printer

display in landscape or portrait mode

Users are free to choose whether to operate the external panel or the one installed on the printer.

USB 2.0 Hi-Speed device to connect a printer

1. **LED:** Power ON
2. **USB port** to plug a service key or a memory stick, to transfer data to the IFFS memory
3. **Connecting USB cable**, lengths 1.8 m to 16 m
   If length succeeds 3 m, use only specified cables.
   For dimensions see assembly instructions

Print heads

2.1

A print head can be replaced by any other one, provided they are of equal width.
They are detected and calibrated by the CPU automatically.

Major data such as the operational performance, maximum operational temperatures and heat energies are kept in memory on a print head. The data can be read at the premise.

Print heads provided for SQUIX 2, SQUIX 4 - 300, 600 dpi

to print sharp-edge images
to print small fonts and graphics on typeplates
to print on materials that imply high energy needs

Print heads provided for SQUIX 4.3, SQUIX 6.3 - 203, 300 dpi

durable
to operate in harsh environments, thermal direct printing

Print rollers

2.2, 2.5

Two materials:

Print rollers DR

Synthetic rubber coating
highly accurate print images, provided as standard

Print rollers DRS

Silicone coating
extra long service life at a higher print image tolerance

Interfaces

1. to plug a **SD memory card**
2. **2 USB hosts** to plug a service key, USB memory stick, keyboard, barcode scanner, USB Bluetooth adapter, USB WLAN stick, external operation panel
3. **USB 2.0 Hi-Speed device** to connect a PC
4. **Ethernet 10/100 Mbit/s**
5. **RS232-C** 1,200 to 230,400 baud / 8 bit
6. **Digital I/O interface**
   a standard on peel-off devices, an option for basic devices

   Printing is triggered by a PLC, a sensor or with the help of a hand switch. Status and error reports are displayed.

   compliant to IEC/EN 61131-2, type 1+3

   All the inputs and outputs are galvanically isolated and protect from reverse polarity. The outputs also protect from short circuit.

PNP inputs	PNP, NPN outputs
Start printing or labeling	Device ready
Print first label	Print data available
Reprint	Initial / upper end position
Delete print job	Paper feed ON
Label removed	Label in peel-off position
Stop printing or labeling	Label transfer / lower end position
Pause	Pre-warning to ribbon ending
Reset	Collective error

cab makes use of free and Open Source software in its products.
See information provided on **www.cab.de/opensource**

OPC UA

All the latest cab printers are ready to interact with machines and components of different manufacturers in industrial plants.

An OPC UA server and a client are a part of the firmware.

For further data see also the Internet:
www.cab.de/en/opcua

Label software

cablabel S3 - design, print, administrate

cablabel S3 opens up the full potential of cab devices. At first, a label must be defined. Its modular design enables cablabel S3 adapt to requirements step by step. Embedded plug-ins like the JScript Viewer support features such as native JScript programming. The designer user interface synchronizes in real time, so are JScripts codes. Integrating the Database Connector or a barcode verifier are options.

For further information see
www.cab.de/en/cablabel

Stand-alone printing

Deciding for this operating mode enables a printer to select and print labels even when there is no host system connected. Labels can be designed using software such as cablabel S3 or programmed in a text editor directly on a PC. Data such as label formats, texts, graphics, as well s contents from a database can be stored on a memory card, a USB memory stick or in the printer's internal IFFS memory. Only variable data are sent by a keyboard, a barcode scanner, a scale or any other host system to a printer to be printed. It may also be recalled by the Database Connector from the host and printed.

Printer control

Drivers

cab provides 32 / 64 bit drivers to control a printer with software other than cablabel S3.
To run the drivers, operating systems need to be at least Windows[1] Vista, Mac OS X[2][3] 10.6 and Linux[3] CUPS 1.2.

Free download on **www.cab.de/en/support**

Programming

JScript

cab printers embed the JScript programming language.
Free manual download on **www.cab.de/en/programming**

abc Basic Compiler

abc in addition to JScript and as an integral firmware component enables advanced printer programming before data are edited for printout. For example, external printer languages can be replaced without intervening in the print application in progress. Data may be imported as well from other systems such as scales, barcode scanners or a PLC.

Integration

Printer Vendor Program

cab as a partner in this program developed a replace method to control cab printers from SAP[4] R/3 using SAPScript. Only variable data are sent by a host system to a printer. They unite on the printer with the images and fonts that have been stored in the local memory (IFFS, memory card, etc.).

Printer administration

Configuration in the Intranet and Internet

cab printers integrate a HTTP and FTP server. By this, a printer can be controlled and configured, firmware updated and memory cards managed using standard applications such as web browsers or FTP clients. Using SNMP/SMTP clients, the attention of administrators or operators is drawn to warnings and errors via email or SNMP datagrams. Time and date are synchronized using a time server.

Network Manager in preparation

Several printers can be managed simultaneously in a network, controlled and configured from one place. So are firmware updates, memory card management, data synchronization and PIN administration.

Database Connector

Printers connected to a network may access data directly from a central ODBC or OLEDB database and print it on a label. While printing, data can be rewritten to the database.

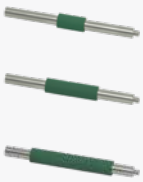
[1)] designed for the A+ printer series, adapted to SQUIX; supplied until external rewinders ER20x will be available

Accessories

2.4



Print roller DR4-M25
to process liners and continuous materials
up to 25 mm wide

Print roller DR4-M50
to process liners and continuous materials
up to 50 mm wide

Print roller DR4-M80
to process liner and continuous materials
up to 80 mm wide

Synthetic rubber coating
for highly accurate print images

2.5

Print roller DRS4
to process materials up to 120 mm wide

Silicone coating for extra long service life
at a higher print image tolerance

2.6

External operation panel
If the operation panel on a printer
cannot be accessed after installation,
an additional external one can be plugged.

Printer connection: USB 2.0 Hi-speed device

Connecting cables are required for power supply.
The following or equivalent cables ensure
functionality.

Connecting USB cable, length 1.8 m
Connecting USB cable, length 3 m
Connecting USB cable, length 5 m
Connecting USB cable, length 11 m
Connecting USB cable, length 16 m

2.7

Antistatic brush
to dissipate electrostatic charge after printing,
in particular if plastic materials are in use

2.8

Adapter 100
to process label rolls
having a core diameter of 100 mm
and outside diameters succeeding 180 mm

2.9

SD memory card

2.10

USB memory stick

2.11

USB WLAN stick
2.4 GHz 802.11b/g/n + 5 GHz 802.11a/n/ac

A rod antenna provides extended ranges
in infrastructure mode.

2.12

USB Bluetooth adapter

2.14

Present sensor PS800
for use with materials guided left-aligned

Labels in peel-off position are detected.
After a label has been removed,
the next one is printed automatically.

Label widths from 16 mm
Label heights from 6 mm
7 mm distant from locating edge

2.15

Present sensor PS900
for use with materials guided left-aligned
or centered

The moveable sensor in particular qualifies
for detecting small or customized labels.
After a label has been removed,
the next one is printed automatically.

Label widths from 4 mm
Label heights from 6 mm
Left-aligned: 12 - 60 mm distant from locating edge
centered: position ibid.

2.16

Present sensor PS1000 MP
for use with materials guided centered

Labels in peel-off position are detected.
After a label has been removed,
the next one is printed automatically.

Label widths from 4 mm
Label heights from 6 mm
centered position

2.17

Extended peel-off plate DP410
to process labels that hardly separate from their
liner due to a strong adhesive or very thick liner
material. Use only if printing on demand has
been triggered by the touch of a button or by a
control signal. A present sensor cannot be used.

2.18

Reflective product sensor
to detect products automatically on a conveyor

3.1

Digital I/O interface
Labeling is triggered by a PLC, a sensor
or with the help of a hand switch. Status
and error reports are displayed. A standard
on peel-off devices, an option for basic devices

3.2

I/O interface plug, SUB-D, 25 pins
Clamping screws are provided to plug
all the control signals to the I/O interface.

3.3

Label selection - I/O box
16 labels per box can be selected from
a memory card by a superior control unit
such as a PLC. Two boxes may be plugged.
Using an I/O box, four inputs and outputs
suffice to implement simple PLC processes
via abc programming.

3.4

Hand switch TR2
to plug to the digital I/O interface

3.5

Foot switch
to plug to the digital I/O interface

4.1

Connecting RS232-C cable
9/9 pins, length 3 m

Cutting, verification, tube labeling

5.4

NEW

Cutter CSQ 400 provided for all basic SQUIX 4 devices
assembled to a printer (see delivery program Pos. 1.12/13) or accessorial on delivery.

Paper labels and self-adhesive labels, cardboard and plastic materials, as well as shrink tubes can be cut. By pivoting the cutter, materials can be accessed to be removed. Label heights can be set on the tray.

By keeping in memory the number of cuts, wear can be controlled.

The CSQ 402 provides a more powerful engine and titanium-coated cutters. These guarantee highly performant cutting even through thick materials such as cardboard and shrink tubes, as well as through self-adhesive materials.

Cutter			CSQ 401	CSQ 402
To be used with			**all basic SQUIX 4 devices**	
Material	Width	up to mm	120	120
	Weight of cardboard	up to gr/m²	200	300
	Thickness	mm	0.7	1.1
Cut length		from mm	10	10
Tray to collect materials length		up to mm	100	100
Material passage		up to mm	2.5	2.5
Cycle performance with material 1 mm high, no backfeed		cuts/min	120	200
Service life motor no. of cuts		up to	2 mio.	5 mio.
	cutter no. of cuts	up to	1* mio.	2* mio.
Controls			cutter has not reached final position, cutter pivoted, cover removed from cutter	

*depending from the material

2.13

NEW

Scanner CC200-SQ to detect linear barcodes and 2D codes

A camera checks a barcode printed on a label in horizontal or vertical direction in terms of legibility or content. In the case of a bad encoding, printing stops and the label is removed.

The scanner operates in tear-off mode and peel-off mode.

For further information see assembly instructions: **www.cab.de/en/cc200**

Scanner		CC200-SQ
To be used with		**all SQUIX printers**
Scan distance	mm	45 - 150
Scan angle	°	-15 to +15
Number of barcodes on a label		1
Controls	GOODBAD	legibility
	VERIFY	results in terms of legibility are compared with initial data

7.11

NEW

Tube applicator AXON 2
to label tubes of diameters 10 to 17 mm
AXON 2.1 for diameters 16 - 20 mm see AXON catalog

The tubes may be inserted and removed by hand or automatically by a gripper. They may also be ejected to a tray.

For information on the tube labeling system AXON 2 see
www.cab.de/en/axon-2

Tube applicator			AXON 2
To be used with			**SQUIX 4.3 MP, SQUIX 4 MP**
Tubes	Diameter	mm	10 - 17
	Length including cap	mm	38 - 105
	Conicity	up to %	0.8
Labels	Materials		paper, plastics such as PP, PC
	Width	mm	10 - 56
	Height	from mm	12
Liner	Width	up to mm	60
Controls			applicator pivoted, tube missing, wrong tube diameter

Cutting, perforation, stacking

5.1

Cutters CU

to cut paper labels and self-adhesive labels, cardboard, textile and plastic materials, as well as shrink tubes.

Tray to collect a maximum of approx. 50 labels

Cutter			CU200	CU400		CU600
To be used with			SQUIX 2	SQUIX 4.3 SQUIX 4	SQUIX 4.3 M SQUIX 4 M SQUIX 4.3 MT SQUIX 4 MT	SQUIX 6.3
Material	Width	up to mm	67	120	114	180
	Weight of cardboard	gr/m²	60 - 300			
	Thickness	mm	0.05 - 1.1			
Cut length		from mm	5			
Material passage		up to mm	2.5			
Cycle performance with material 1 mm high, no backfeed		cuts/min	100			
Stop printing if			cutter has not reached final position			
Tray						
Label height		up to mm	-	100		-

5.2

Perforation cutters PCU400

perforate continuous materials such as textile tapes or shrink tubes to simplify separation by hand. Cutting the material is also possible.

Perforation cutter			PCU400/2,5	PCU400/10
To be used with			SQUIX 4.3, SQUIX 4, SQUIX 4.3 M, SQUIX 4 M, SQUIX 4.3 MT, SQUIX 4 MT	
Perforation	Web spacing	mm	2.5	10
	Web width	mm	0.5	
Material	Width	up to mm	85	
	Weight of cardboard	gr/m²	60 - 300	
	Thickness	mm	0.05 - 1.1	
Cut length		from mm	5	
Material passage		from mm	2.5	
Cycle performance with material 1 mm high, no backfeed		cuts/min	100	
Stop printing if			cutter has not reached final position	

5.3

Stacker ST400 M providing a cutter

1. Printed materials are cut and collected. As soon as stacking has reached its maximum height, printing interrupts. Limitations may occur with stiff or curved materials. We recommend to have such applications tested by cab.
2. Devices can be set anywhere on a table with the help of a base frame.

Stacker providing a cutter			ST400 M
To be used with			SQUIX 4.3 M, SQUIX 4 M SQUIX 4.3 MT, SQUIX 4 MT
Material	Width	mm	20 - 100
	Weight of cardboard	gr/m²	60 - 300
	Thickness	mm	0.05 - 0.8
Cut length		mm	20 - 150
Material passage		up to mm	1.2
Cycle performance with material 1 mm high, no backfeed		cuts/min	100
Stop printing if			cutter has not reached final position, paper jam, stacker cover open, stacking has reached maximum height
Stacking height		up to mm	100

Support table - label W x H

The table and the protective cover adapt to the label size.
To be requested individually

Rewinding, unwinding with or without the use of a cardboard core

6.1

Guide plates RG enable labels to be rewound internally on peel-off printers.
The peel-off plate is therefore replaced by a guide plate.

Guide plate		RG200	RG400	
	To be used with	SQUIX 2 P	SQUIX 4.3 P SQUIX 4 P	SQUIX 4.3 MP SQUIX 4 MP
	Material width up to mm	67	120	114
	Roll diameter up to mm	142		
	Tightening axle core diameters of mm	38.1 - 40		
	Winding	outside		

6.3

External rewinders ER1, ER2 to plug directly to a printer using screws
They pick up materials wound either on the outside or on the inside.
An electronic swing arm keeps winding consistent and tight.

External rewinder		ER1/210	ER2/210
To be used with		SQUIX 4.3, SQUIX 4 SQUIX 4.3 M, SQUIX 4 M	SQUIX 6.3
Material width	up to mm	120	180
Roll diameter	up to mm	205	
Tightening axle core diameters of	mm	76	
Winding		outside or inside	

6.5

6.7

External rewinders ER4, ER6 providing a built-in power supply unit
They operate also with printers other than cab.
They pick up materials wound either on the outside or on the inside.
An electronic swing arm keeps winding consistent and tight.

External rewinder		ER4/300	ER6/300
To be used with		SQUIX 4.3, SQUIX 4 SQUIX 4.3 M, SQUIX 4 M	SQUIX 6.3
Material width	up to mm	120	180
Roll diameter	up to mm	300	
Tightening axle core diameters of	mm	76	
Winding		outside or inside	
Kit to adapt			
ER4, ER6 to a SQUIX printer			
ER4, ER6 and EU4, EU6 to a SQUIX printer			

6.6

6.7

External unwinders EU
enable labels to be fed consistent even if rolls are heavy.
They pick up materials wound either on the outside or on the inside.

External unwinder		EU4/300		EU6/300
To be used with		SQUIX 4.3 SQUIX 4	SQUIX 4.3 M SQUIX 4 M SQUIX 4.3 MT SQUIX 4 MT	SQUIX 6.3
Material width	up to mm	120	114	180
Roll diameter	up to mm	300		
Core diameter	up to mm	38.1		
	adapter included mm	76		
Winding		outside or inside		
Kit to adapt				
EU4, EU6 to a SQUIX printer				
ER4, ER6 and EU4, EU6 to a SQUIX printer				

Applicator S1000

7.1

Labeling in real time

A S1000 assembled to a SQUIX peel-off printer provides a cost-effective solution if operated semi-automatically or integrated in vertical orientation in production lines. A stroke cylinder applies the labels to products.

1. **Long service life**
   The ball bearing guide bars are low-wear.
2. **Products of different heights**
   can be labeled by means of a stroke cylinder. Various stroke lengths are provided.
3. **Compressed air regulation unit**
   Micro filters prevent from contamination. Regulating the pressure ensures a permanent good labeling quality.
4. **Highly-reliable processes**
   The supporting air, intake air and stroke speed may be adapted. If sensitive products and packagings are in use, the pressing force can be reduced to less than 10 N (1 kg). To prevent intake ducts from contamination, they get purged after any labeling.
5. **Label sizes**
   Labels 25 to 176 mm wide and 25 to 200 mm high can be applied.
6. **Supporting air**
   to blow labels onto a pad
7. **Pad**
   Labels are transferred to a pad and held there by vacuum. They move towards a product uby means of a stroke cylinder.

Pre-dispense button

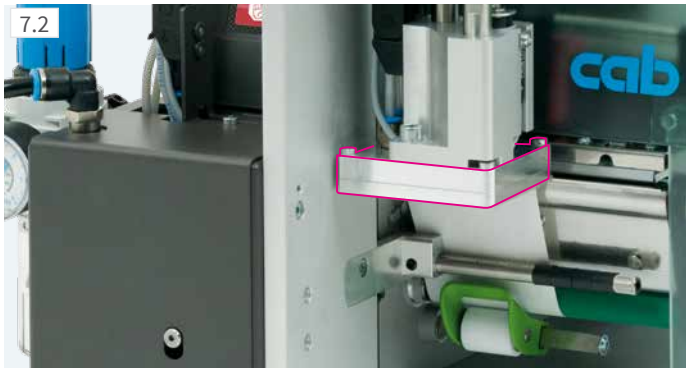
to verify a labeling process. By pushing the button once, a label is printed and transferred to the applicator. By pushing the button once more, labeling is triggered.

Applicator		S1000-220	S1000-300	S1000-400
To be used with		SQUIX 2, SQUIX 4.3, SQUIX 4 SQUIX 4.3 M, SQUIX 4 M, SQUIX 6.3		
Cylinder stroke	mm	220	300	400
Pad stroke below the device	mm	64	144	244
Compressed air	bar	4.5		
Cycle rate	labels/min approx.[1)]	25		

[1)] calculated at a stroke of 100 mm below the device, with labels 100 mm high, at a print speed of 100 mm/s

Accessories

7.2

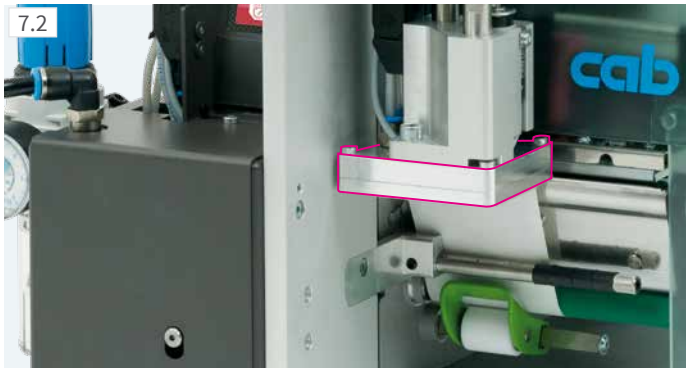


Universal pads

Drilled intake holes are arranged in a grid and covered by foil, to be pierced according to the size of a label.

Universal pad		A1021		A1021
To be used with		SQUIX 2	SQUIX 4.3 SQUIX 4	SQUIX 4.3 SQUIX 4
Label width	mm	25 - 63	25 - 70	25 - 90
Label height	mm	25 - 60		25 - 90
Product surface		flat		
Product height		various		
State of a product during labeling		at rest		

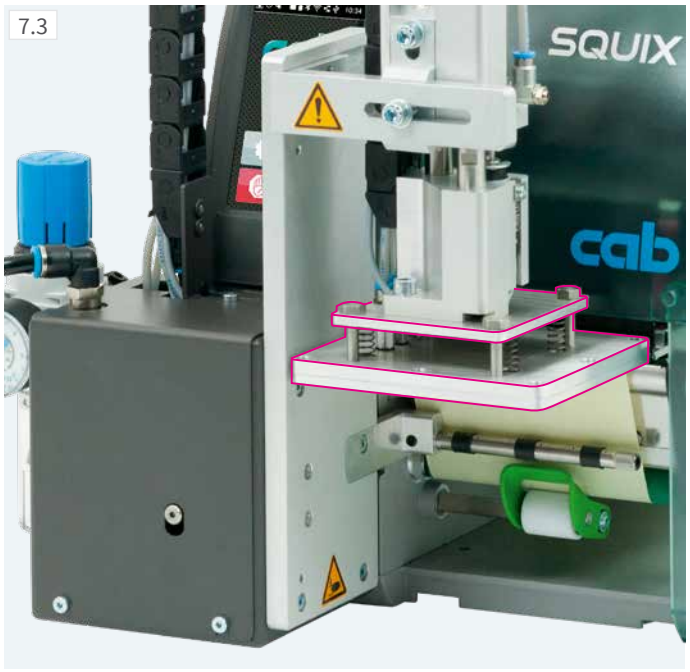
Applicator S1000 accessories



Tamp pads

are manufactured according to the size of a label.

Tamp pad		A1021		
To be used with		SQUIX 2	SQUIX 4.3 SQUIX 4	SQUIX 6.3
Label width	mm	25 - 63	25 - 116	50 - 176
Label height	mm	25 - 200		
Product surface		flat		
Product height		various		
State of a product during labeling		at rest		



Universal pads, spring-mounted

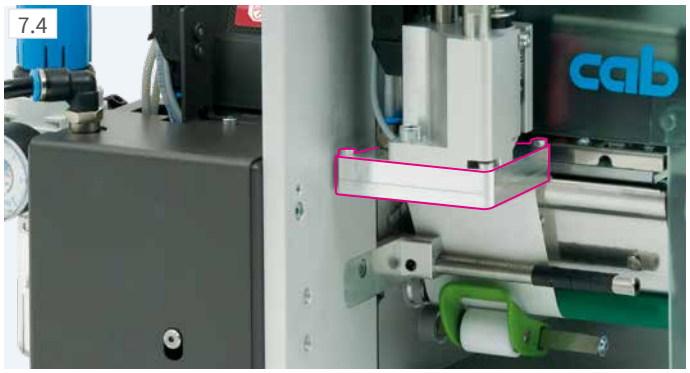
Pitch of spring enables labels to apply even on inclined surfaces.
Drilled intake holes are arranged in a grid and covered by foil, to be pierced according to the size of a label.

Universal pad		A1321	A1321
To be used with		SQUIX 4.3, 4	SQUIX 4.3, 4
Label width	mm	25 - 116	25 - 116
Label height	mm	25 - 102	25 - 152
Product surface		flat	
Product height		various	
State of a product during labeling		at rest	

Tamp pads, spring-mounted

Pitch of spring enables labels to apply even on inclined surfaces.
Manufacture according to the size of a label

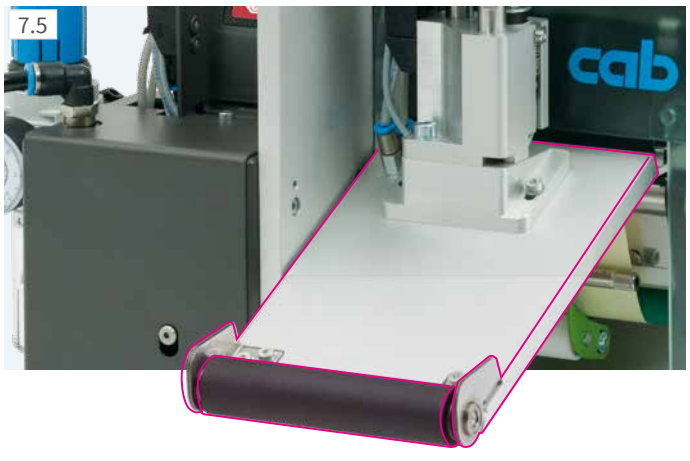
Tamp pad		A1321	
To be used with		SQUIX 4.3, 4	SQUIX 6.3
Label width	mm	25 - 116	50 - 176
Label height	mm	25 - 200	
Product surface		flat	
Product height		various	
State of a product during labeling		at rest	



Blow pads

to apply labels on products sensitive to pressure.
A pad moves to a height fixed approx. 10 mm above a product to trigger labeling.

Blow pad		A2021		
To be used with		SQUIX 2	SQUIX 4.3, 4	SQUIX 6.3
Label width	mm	25 - 63	25 - 116	provided on request
Label height	mm	25 - 100		
Product surface		flat		
Product height		fixed		
State of a product during labeling		at rest or in motion		



Roll-on pads

Labels are fed to the roller of a pad during printing.
The pad then moves to the product.
Labels are picked up by the product in motion and rolled on.

Roll-on pad		A1411	
To be used with		SQUIX 4.3, 4	SQUIX 6.3
Label width	mm	25 - 116	50 - 176
Label height	mm	80 - 200	
Product surface		flat	
Product height		various	
State of a product during labeling		in motion	

Applicator S3200

Labeling in real time

A S3200 assembled to a SQUIX peel-off printer provides a cost-effective solution if operated semi-automatically or integrated in production lines. Printed labels are applied to products automatically. For this purpose, labels are set 45° to 95° to the horizontal by a rotary cylinder and move towards products by means of a a short-stroke cylinder.

In terms of service life, pre-dispense, compressed air regulation, process reliability and supporting air, data correspond to the S1000 applicator (see page 18).

Applicator		S3200
To be used with		**SQUIX 2, SQUIX 4.3, SQUIX 4, SQUIX 4.3 M, SQUIX 4 M**
Rotary cylinder		45° - 95°
Stroke cylinder	up to mm	30
Immersion depth Pad F	up to mm	5
Compressed air	bar	4.5
Cycle rate labels/min approx.[1]		20

[1] calculated with labels 40 mm high, at a print speed of 100 mm/s

Tamp pads or blow pads

are manufactured according to the size of a label.

Tamp pad		A3200-1100	
To be used with		**SQUIX 2**	**SQUIX 4.3, 4**
Label width	mm	4 - 63	10 - 116
Label height	mm	6 - 80	
Product surface		flat	
State of a product during labeling		at rest	
Blow pad		**A3200-2100**	
To be used with		**SQUIX 2**	**SQUIX 4.3, 4**
Label width	mm	10 - 63	10 - 116
Label height	mm	10 - 80	
Product surface		flat	
State of a product during labeling		at rest or in motion	

Demand modules

Demand modules S5104, S5106

label products in motion on a conveyor. Positions are detected by a product sensor. As soon as peel-off has been triggered, the next label is printed. The speed of a product on the conveyor must adapt to the print speed. A reflective sensor detects positions.

Demand module		S5104	S5106
To be used with		**SQUIX 4.3, SQUIX 4**	**SQUIX 6.3**
Label width	mm	25 - 116	50 - 176
Label height	mm	25 - 210	
Print line distance to the peel-off plate	mm	336 - 518	
Product surface		flat	
Product height		fixed	
State of a product during labeling		in motion, speed adapted to the printer	
Cycle rate labels/min approx.[1]		60	

[1] calculated with labels 100 mm high, at a print speed of 100 mm/s

All-around labeler

7.10

All-around labeler

to label cylindric items on a 360° circumference. Products are laid onto the rollers and labeling is triggered via a hand switch or a foot switch.

Delivery includes a mount, a cable to connect to a SQUIX printer, and a foot switch

Tamp pad		A1021	M1021
To be used with		**SQUIX 2**	**SQUIX 4.3, SQUIX 4**
Label width	mm	25 - 63	25 - 116
Label height	mm	25 - 140	
Product diameter	mm	12 - 40	
Product surface		cylindric	
State of a product during labeling		in rotary motion	

Assembly aids provided for SQUIX label printers

8.1

8.2

8.3

Mount

to assemble a labeling system and a product retainer

1. **Mounting plate**
   to assemble a labeling system
2. **Profile**
   aluminum square
   40, 80, 120 mm; further lengths may be provided on request
3. **Base plate**
   to assemble a product retainer
   500 x 255 mm standard size

8.4

8.5

Floor stand

to enable a printer operate quickly and flexibly in any production line. Positions (i.e. heights, widths) on which products need to be labelled can be set in few steps. Four guide rollers on the carriage provide mobility. To be aligned on site using adjustable feet

Floor stand		1600
Total height	mm	1,600
Labeling heights	up to mm	1,400
Outreach to centre of label	mm	230 - 500
Carriage dimensions	W x H x D mm	600 x 140 x 860

8.5

Printer retainer

to fix and quick-lock a label printer

Label printers providing special covers or protective chassis

1.10

Printers providing a conductive ESD surface
available for all printer types

All the parts of a casing are manufactured according to DIN EN 61340-5-1:2016 to protect from electrostatic charge.

Surface resistant according to DIN IEC 60093 ≤ 10^4 ohm;
charge reduces from 1,000 V to 100 V in less than two seconds

The hinged cover with the upper device plate (as a unit) are provided as a spare part.

1.11

Printers for use in food applications
available for all printer types

Covers are magnetic so that splindered parts can be detected by metal detectors or x-ray inspection systems.

Blue color serves for optical differentiation from food.

The entire casing may be manufactured detectable on request.

The materials manufactured comply with food regulations such as EU Nr. 10/2011 and FDA CFR 21 177.2600.

9.3

Stainless steel chassis to protect in food applications
available for SQUIX 4 and SQUIX 6 printers

Labels are removed through the front.

FThe front has to be opened and the printer pulled out on telescopic rails to replace materials. Close the front for steam jet cleaning.

Protection class IP69K according to EN 60529

9.4

Chassis to protect from dust
available for SQUIX 4 and SQUIX 6 printers

Labels are removed through the front.

The fan with a filter provide overpressure and prevent from dust entering the chassis.

Protection class IP52 according to EN 60529

Chassis providing a suction nozzle to protect in cleanroom applications
available for SQUIX 4 and SQUIX 6 printers

Maintenance

Label sensors
unlock by touch to be pulled out.

Print heads
require few steps to be replaced.
In general, no adjustments are needed.

Print rollers
are quick and easy to remove using a screw.

ONE tool
is provided ready on a device to replace all the components and assemble periphery.

Service

Trained cab technicians provide worldwide support in maintenance and repair matters.

Send your printer to a cab service point or a selected service partner. Your device will be checked and repaired within few workdays. If required, a loan unit will bridge the gap.

You prefer maintenance and repair in your company? Then make an appointment with our Service Department: phone **+49 721 6626 300**, email: **service.de@cab.de**

Trainings

Refresh your know-how of cab devices as regards efficient operation, service and repair.

Our trainings in Karlsruhe provide information on how to operate a device, label design, software, printer drivers, programming, database access and how to integrate in a network or a superior ERP system. We gladly send you comprehensive data on our current trainings.

We also offer trainings adapted to your demands - either at our premise in Karlsruhe or in your company.
