

# WD200

## 3.1" Wearable Computer

Qualcomm® 660 platform | 110g with 2050mAh battery | 2X2 MU-MIMO WLAN

### Smart, Hands-free Mobility

Power your data collection with a device that optimizes the way you work. Featuring lightweight and ergonomic wearable design, the WD200 is a 3.1" Android 10 wearable device with GSM certification that supports users to work in an intensive picking environment requires all hands to be free. The terminal is light weight of 110g with battery and it features EZ Lock arm strap design, easy to replace the main unit in a few seconds. Combined with one of our featured ring scanners, both hands can remain free during work without interfering with the workflow.

### Experience Heightened Device Performance

Experience heightened device performance with a Qualcomm 660 2.2GHz octa-core processor and ease of use with a wearable that fits wrists, necks, and belt loops. A 3.1-inch sunlight readable touchscreen offers easy viewing with 450 nits brightness and supports gloves and wet resistance, also comes with a 13MP camera that gives the flexibility to capture barcodes and delivery confirmations for applications in the warehouse, retail, logistic, transportation and shipping yard.

### Get Connected

Together with extended connectivity, the WD200 supports Bluetooth®5, NFC, 4G LTE, and WLAN 802.11 ac with 2X2 MU-MIMO Antenna that boosts the performance by allowing devices to be connected simultaneously. It is not only equipped with dual MIC design, giving clear voice even in a noisy environment but also enhances the industrial durable protection with features including IP67 dustproof and 1.5m drop resistant of fall protection. The WD200 is a reliable tool to improve business productivity.

Development Tools

unitech SDK

Device Management

Staging and Management

**MoboLink**

Android Enterprise ready EMM for monitoring device health and managing apps, configs and files.

**StageGO**

Barcode-based device staging utility offering hundreds of script commands for you to work with.

**OEMConfig**

If you are using a third party EMM, OEMConfig will allow those EMM solutions to configure unitech specific settings on the device.

**Enterprise Launcher**

Secure your devices by kiosking them with Enterprise Launcher. Block access to the Android system and only allow limited number of apps to be run.

**Battery info**

Monitor advanced Battery health and manage the battery replacement cycle. Use with MoboLink to get real-time battery health alerts delivered to your phone.

**Software Update**

Check and install software updates online. To let a device always stay up-to-date, setup the device to automatically check and install for updates on boot up.

**System Update Center**

Check and install firmware updates via FOTA. You can update the firmware via online FOTA server, or by using a OTA ZIP file placed in the internal storage.

**App Update Center**

APKs install with App Update Center can remain intact even after factory reset.

Productivity and Utilities

**File Manager**

Manage files and folders on all the internal and external storage options

**UNote**

A simple text viewer and editor for use in your work flows.

**Startup**

Auto-run apps when device boots up.

**KeyRemap**

Reprogram physical buttons to act as another key or to launch an app.

**Unitech Scanner Utility**

The Unitech Scanner Utility offers Scan-to-key and engine configuration capability all in one app.

**NTP Server Settings**

Customize the NTP server setting to keep your device date and time synchronized.

**WLAN Advanced**

Configure advanced WiFi parameters.
