Products need labeling

Label printers with highest operating comfort

COS Made in Germany

Types

1.2

One concept, two sizes

The EOS series combines all functions of a solid label printer with highest operating comfort.

eoss

COS2, the compact one for label roll diameters up to 152 mm

Label printer		EO	S 2
Printable resolution	dpi	203	300
Print speed	up to mm/s	150	150
Print width	up to mm	108	105.7
Label roll diameter	up to mm	152	152
Power supply		100 - 240 VA	AC, 50/60 Hz

with diameters up to 203 mm

Label printer		EO	S 5
Printable resolution	dpi	203	300
Print speed	up to mm/s	150	150
Print width	up to mm	108	105.7
Label roll diameter	up to mm	203	203
Power supply		100 - 240 VA	AC, 50/60 Hz

Mobile printing

in production, warehousing or agriculture, wherever labels are required and access to electricity is missing. 24 V input voltage enable the printer to be power supplied by any powerful battery. For technical battery data see accessories

eoS2 mobile

for label roll diameters up to 152 mm

Label printer		EOS 2 mobile
Printable resolution	dpi	300*
Print speed	up to mm/s	150
Print width	up to mm	105.7
Label roll diameter	up to mm	152
Power supply		16.5 - 25 VDC

eoS5 mobile

for label roll diameters up to 203 mm

Label printer		EOS 5 mobile
Printable resolution	dpi	300*
Print speed	up to mm/s	150
Print width	up to mm	105.7
Label roll diameter	up to mm	203
Power supply		16.5 - 25 VDC

2

Details

To achieve accurate imprint with slim materials and ribbons, slim print rollers are needed. These prevent from print roller wear, print head contamination and errors during material feed.

Operation panel

Intuitive and easy operation with self-explanatory symbols to configure the device setups

 LED signal: 	Power ON					
2 Status bar:	Data reception, Record data stream, Ribbon pre-warning, SD memory card / USB memory stick, Bluetooth, WLAN, Ethernet, USB slave, Time					
3 Printer status:	Ready, Pause, Number of printed labels per print job, Label in peel-off position, Awaiting external start signal					
4 USB slot	for the Service Key or a memory stick, to load data in the IFFS storage					
5 Operation:	Cutter / perforation cutter: cutting Tear-off mode: print label					
	💿 Jump to menu 🛞 Stop and delete					
	🛅 Reprint last label 🛛 🚺 Label feed					
	Interrupt and continue print job					

Interfaces on the back of the device

- 1 Slot for a SD memory card
- 2 x USB host to connect a Service Key, USB memory stick, keyboard, barcode scanner, USB Bluetooth adapter, USB WLAN stick
- **3 USB 2.0 Hi-speed Device** to connect a PC
- 4 Ethernet 10/100 Mbit/s
- 5 **RS232C** 1,200 to 230,400 baud/8 bit

Roll holder

The label roll is inserted and automatically centered when closing.

2 Ribbon holder

The stop can be adjusted according to the ribbon width.

3 Print head 203 / 300 dpi

In case of cleaning or wear, the print head can be replaced easily by hand without tools.

4 Label sensor - gap or reflective

The sensor position can be adjusted via a spindle using the red rotary knob. The chosen position is indicated by a LED.

OPTINE STATES OF CONTRACT STATES OF CONTRACTS OF CONTR

In case of cleaning or wear, the print roller can be replaced without tools.

6 Material guide

Using the rotary knob, the guides can be adjusted to the material width

Tear-off plate

made of thin sheet steel; jagged, so labels are cleanly separated

¹⁾ The material specifications are standard values. Applications with small labels, thin, slim, thick and stiff materials as well as strongly adherent labels have to be tested. ²⁾ The ribbon should at least correspond with the width of the liner material.

Label software cablabel S3

Designing, printing, administrating

cablabel S3 opens up the full potential of cab devices.

First of all, the label must be designed. Only when it comes to printing it has to be decided whether the label shall be processed on a label printer, a print and apply or marker laser system. cablabel S3 is of a modular design which makes it adaptable to requirements step by step. To support functions like native JScript programming, elements such as the JScript Viewer are embedded as plug-ins. The designer user interface and the JScript code are synchronized in real time. Special functions like the Database Connector or barcode testers can be integrated. For further information see www.cab.de/en/cablabel

Toolbar

to create different label objects

2 Tabs

to quickly switch from one running label design to another

3 Layers

to administrate different label objects

4 Designer

simplifies the design and displays the label WYSIWYG

5 Printer spooler

to monitor all print jobs and the state of the printer

6 Drivers

for setting and the communication with devices

Printing in stand-alone operation

This operating mode is the printer's ability to select and print labels even when it is not connected connected to a host system.

The label has to be designed with a software such as cablabel S3 or by direct programming with a text editor on a PC. Label formats, texts, graphics as well as database contents are stored on a memory card, a USB memory stick or in the internal IFFS memory.

Only variable data are sent to the printer via a keyboard, a barcode scanner, scales or other host systems and/or recalled by the Database Connector from the host and printed.

Printer control

Drivers

To control the printer with a software other than cablabel S3, cab provides drivers in 32 / 64 bit for operating systems starting from Windows Vista, Mac OS 10.6 and Linux with CUPS 1.2.

Windows¹⁾ drivers

cab printer drivers are certified according to WHOL. They ensure optimum stability on the Windows operating system.

Mac OS X²⁾³⁾ drivers

cab provides CUPS-based printer drivers for Mac OS X applications.

Linux drivers³⁾

Linux drivers are CUPS-based.

Free download on www.cab.de/en/support

Programming JScript

JS

To control the printer, cab has developed the embedded cab programming language JScript. See manual for free download at www.cab.de/en/programming

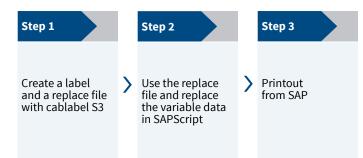

abc Basic Compiler ABC

In addition to JScript and as an integral part of the firmware, it allows advanced printer programming before data are sent to printout. For example, external printer languages can be replaced without interfering in the current print job. Also data from other systems such as a scale, a barcode scanner or PLC can be integrated.

Integration

Printer Vendor Program

SAP As a partner in SAP's⁴⁾ Printer Vendor Program, cab has developed a replace method to enable easy control of a cab printer via SAPScript from SAP R/3. Only variable data are sent to the printer by the host. Pictures and fonts that had priorly been stored in the local memory (IFFS, memory card, etc.) are merged.

¹⁾ Windows is a registered trademark of Microsoft Corporation

- ²⁾ MAC OS X is a registered trademark of Apple Computer, Inc.
- ³⁾ for device series SQUIX, MACH 4S, EOS, HERMES Q, PX Q
- ⁴⁾ SAP and all corresponding logos are trademarks

or registered trademarks of SAP SE

Printer administration

Configuration in Intranet and Internet

The HTTP and FTP server integrated in the printer via standard programs like a web browser or FTP clients allows printer control and configuration, firmware updates and memory card administration. Via email or SNMP, the SNMP and SMTP client datagram sends status, warning and error messages to administrators and users. Time and date are synchronized by a time server.

Network Manager in preparation

It is possible to simultaneously manage several printers within the network. Control, configuration, firmware updates, memory card administration, data synchronization and PIN administration are supported from one single location.

Database Connector

Printers connected to a network may directly access data from a central ODBC or OLEDB-ready database and print it on a label. While printing, data can be rewritten to the database.

Accessories for all types of devices

2.3	Print roller DR4-30 Material width up to 30 mm; synthetic rubber coating for accurate imprint	2.5 Image: Constraint of the second sec	SD memory card USB memory stick
	Print roller DR4-60 Material width up to 60 mm; synthetic rubber coating for accurate imprint	2.7	USB WLAN stick 2.4 GHz 802.11b/g/n USB WLAN stick 2.4 GHz 802.11b/g/n + 5 GHz 802.11a/n/ac in infrastructure mode with rod antenna
2.4	External operation panel providing the same functionality	2.9	for extended reach USB Bluetooth adapter
	operate the printer on the external panel or on the one integrated in the device. Printer connection: USB 2.0 Hi-speed device Connecting cables are required for power supply. The following or equivalent cables	2.10	Label selection - I/O box Up to 16 different labels per box can be selected from the memory card by a master control, e.g. PLC. Two boxes can be connected. The I/O box allows simple PLC control processes with four inputs and outputs each via abc programming.
\bigcirc	ensure functionality. Connecting cables USB Lengths 1.8 to 16 m	3.1	Connecting cable RS232 C 9/9 pin, length 3 m

All printable materials can be cut. The cutter can be pivoted to exchange the material.

		Cutter
Technical data		for EOS 2, EOS 5
Material Width	mm	120
Weight card	board gr/m ²	60 - 240
Thickness	mm	0.05 - 1.1
Cutting length	from mm	10
Gap height	up to mm	2.5
Cuts/min	up to	200
Label winding		preferably outside
Monitoring		Cutter pivoted, final cutter position has not been reached

Cutter and perforation cutter

Continuous materials such as textiles or shrink tubes are perforated before they are manually separated. In addition, the materials can also be cut. The cutter can be pivoted to exchange the material.
